

General Services Administration

General Services Administration (GSA)

GSA Federal Supply Services Multiple Award Schedule program harnesses the power of service contracting by delivering comprehensive solutions that meet your agencies' needs.

The purpose of this service is to provide Federal agencies a quick and efficient means of dealing with their environmental needs.

The Multiple Award Schedule program offers the following benefits:

- Your selection is based on "Best Value".
- An unimpeded relationship between the agency and the contractor.
- Blanket Purchase Agreements can be used to customize your solution.
- Contractor teaming arrangements allow a total solution approach to meet your needs.
- For more details see FAR 3.102(d) (3).

Accessing Aerotech's Contract

Step by step instructions for ordering services from a GSA contractor are at www.gsaadvantage.gov

Aerotech – Who are we?

Aerotech Laboratories, Inc. is a full service indoor air quality testing facility, specializing in the analysis of mold, bacteria, allergens, and chemical testing. Our fully accredited (AIHA, A2LA) laboratories offer extremely competitive pricing, data access 24 hours a day, 7 days a week, and carry a complete line of sampling equipment and supplies.

Capability and Federal Experience

- **Quality Data** – Through stringent compliance with federal programs such as ISO17025 and applicable industry organizations (AIHA, A2LA), we will consistently and reliably provide data that meets or exceeds best industry standards. Our quality system meets the requirements of virtually all government agencies and associations.
- **Proven Project Management** – We have seasoned Project Managers (PMs) to serve as your point of contact. They will assure our GSA Client is provided with dependable service and continuous responsive communications. Your dedicated PM has the knowledge and authority to handle all of your requests and concerns. From discussing technical issues involving data, to coordinating sample supply delivery, your PM will make it easy and efficient for you to communicate with the laboratory.
- **Innovation** – Aerotech has a reputation for innovative ideas. Our laboratory has pioneered the use of new technologies in the IAQ analytical industry and in bringing research techniques into the commercial laboratory. We are dedicated to using the most appropriate methods and the highest level of quality to ensure reliability and accuracy.
- **Accreditation** - Aerotech Laboratories, Inc. is inspected, licensed and/or proficiency tested by a number of governmental agencies and independent associations, including the Arizona Department of Health Services, Food and Drug Administration (FDA), the United States Department of Agriculture (USDA) and the American Industrial Hygiene Association (AIHA).
- **Electronic Data Deliverables** – Aerotech is able to supply data in several major government formats.

Office & Scientific Equipment Center
Contract No. GS-07F-5589P

Capability and Federal Experience

As one of the leading providers of analytical testing services to the United States Government, we understand the need for reliable, defensible data, delivered on time and in a specific format.

Department of Defense

Aerotech has analyzed thousands of samples for volatiles, semi-volatiles, air toxics, pesticides, explosives, metals and petroleum products in support of the environmental efforts of the U.S. Army, Air Force Navy, Coast Guard, National Guard, and Army Reserve.

We have performed analyses on samples from over 100 DOD sites in 35 states including Air Force bases, Army bases, Naval shipyards and air stations.

GSA Approved Pricing and Highest Value

The benefits described, combined with Aerotech's competitive prices, provide excellent value for the analytical services and technical support required for your program. Our well-designed analytical approach includes correct documentation, dependable "best standards" quality and efficient communication. This approach will reduce inefficiencies and prevent errors, thus reducing overall costs and providing best value for our clients.

Federal Supply Schedule

SIN 873-2 Chemical Testing and Analysis Services

Services for chemical testing and analysis include, but are not limited to, **Organic Analyses** including volatiles, semivolatiles; pesticides, herbicides, PCBs, TPH, Appendix IX, TCLP and other regulatory lists; **Inorganic Analyses** including metals and a full range of wet chemistry analyses for nutrients, BOD, COD, and virtually all other general chemistry parameters.

Specialty capabilities include mixed waste analyses, asbestos testing, ambient air and source testing, aquatic toxicology, **indoor air quality**, PCB congeners, dioxin/furans, explosives and radiochemistry.
